FP Mailing Solutions Launches Cost-Saving mailone™ Software

ADDISON, IL April 1, 2010 – FP Mailing Solutions has launched **mailone™**, the comprehensive yet affordable mailing, tracking, and accounting software package that seamlessly saves on postage costs while dramatically boosting the brainpower of postage meters.

“**mailone™** empowers operations of all sizes to take advantage of significant discounts offered under USPS® Commercial-Base Pricing and electronic processing -- without confusion, guesswork, or additional resources,” said Michael Dumas, CEO of FP Mailing Solutions. “**mailone™** means savings are automatic and instant, without even having to think about it.”

mailone™ is a desktop postal consultant, educating mailers on discounts built in to the USPS® system while fulfilling those discount requirements. Electronic processing means signature confirmation is discounted and delivery confirmation is free. Commercial-Base Pricing offers discounts up to 9.9 percent on Priority Mail and 5 percent on Express Mail. USPS® overnight deliveries processed using **mailone™** offer a 5 percent discount and free delivery confirmation, adding up to dramatic savings and convenience over FedEx.

For example, sending two Express Mail pieces a day with **mailone™** could save over \$600 a year over retail rates. If mailing two overnight flats a day, savings would total over \$1,700 in just one year.

“Software with this kind of performance typically is priced for only the largest mailers,” said Kevin A. Pietras, Director of Marketing at FP Mailing Solutions. “But **mailone™** is priced so it can pay for itself in just months, even for small- and mid-sized operations.”

mailone™ accounting features bring new transparency to mailing operations, automatically recording detailed data on an unlimited number of transactions, accounts, and customers. Users can track expenses by department or customer, bill back accounts, or automatically add a handling fee. Detailed reports, in graph or table form, can reveal new opportunities for savings and efficiencies. Cost figures are easily exported to financial accounting software.

“Mailroom accounting used to be tedious and provide limited information,” Pietras noted. “**mailone™** will completely change the industry with its depth and intuitiveness.”

With U. S. headquarters in Addison IL, FP Mailing Solutions is a world-class mailroom solutions provider, meeting the needs of small, mid-sized, and large organizations. FP is the nation’s fastest-growing mailing systems supplier, known for its technologically-advanced equipment, reputable Dealer network, superior Customer Service, and excellent value.
